## ELASTOSIL ${ }^{\circledR}$ RT 601 A/B

Room Temperature Curing Silicone Rubber (RTV-2)
ELASTOSIL ${ }^{\oplus}$ RT 601 A/B is a pourable, addition-curing RTV-2 silicone rubber.

## Properties

- two-part, 9 : 1 mixing ratio
- low viscosity
- medium cured hardness
- excellent tensile strength
- crystal clear vulcanizate

## Technical data

Properties Uncured

| Property | Condition | A | B | Method |
| :--- | :--- | :--- | :--- | :--- |
| Color | - | colorless | colorless | - |
| Density | $23^{\circ} \mathrm{C}$ | $1.03 \mathrm{~g}_{\mathrm{cm}}{ }^{3}$ | $0.97 \mathrm{~g} / \mathrm{cm}^{3}$ | ISO 2781 |
| Viscosity, dynamic | $23^{\circ} \mathrm{C}$ | $5000 \mathrm{mPa} \cdot \mathrm{s}$ | $40 \mathrm{mPa} \cdot \mathrm{s}$ | ISO 3219 |

These figures are only intended as a guide and should not be used in preparing specifications.

Properties Catalyzed A+B

| Property | Condition | Value | Method |
| :--- | :---: | :--- | :--- |
| Viscosity, dynamic of mix | $23^{\circ} \mathrm{C}$ | $3500 \mathrm{mPa} \cdot \mathrm{s}$ | ISO 3219 |
| Platinum catalyst in <br> component | - | A | - |
| Mix ratio $^{(1)}$ | - | $9: 1$ | $\mathrm{~A}: \mathrm{B}$ |
| Pot life ${ }^{(2)}$ | - | 90 min | - |

${ }^{1}$ (pbw)
${ }^{2}$ at $23^{\circ} \mathrm{C}$, up to 20000 mPa s
These figures are only intended as a guide and should not be used in preparing specifications.

Properties Cured
Cured for 30 min at $150^{\circ} \mathrm{C}$ in a circulating air oven.

| Property | Condition | Value | Method |
| :--- | :---: | :--- | :--- |
| Color | - | colorless, transparent | - |
| Density | $23^{\circ} \mathrm{C}$ | $1.02 \mathrm{~g} / \mathrm{cm}^{3}$ | ISO 2781 |
| Hardness Shore A | - | 45 | ISO 868 |
| Tensile strength | - | $6 \mathrm{~N} / \mathrm{mm}^{2}$ | DIN ISO 37 |
| Elongation at break | - | $100 \%$ | ISO 37 |
| Volume resistivity | - | $10^{15} \mathrm{Ohmcm}$ | IEC 60093 |
| Permittivity | - | 2.8 | IEC 60250 |

These figures are only intended as a guide and should not be used in preparing specifications.

## Applications

- Measurement \& Control, Sensor Technology
- Automotive Electronics

## Application details

- all-round potting compound
- manufacture of molded articles by casting

## Processing

Caution:
Only components A and B with the same lot number may be processed together!

Surface preparation:
All surfaces must be clean and free of contaminants that will inhibit the cure of ELASTOSIL ${ }^{\circledR}$ RT 601 A/B. Examples of inhibiting contaminants are

Temperature Curing time, thickness 1 cm

| $23^{\circ} \mathrm{C}$ | 24 h |
| :---: | :---: |
| $70^{\circ} \mathrm{C}$ | 20 min |
| $100^{\circ} \mathrm{C}$ | 10 min | sulfur containing materials, plasticizers, urethanes, amine containing materials and organometallic compounds - especially organotin compounds. If a substrate's ability to inhibit cure is unknown, a small scale test should be run to determine compatibility.

Mixing:
Component A of ELASTOSIL ${ }^{\circledR}$ RT 601 contains the platinum catalyst, component B the crosslinker. Even traces of the platinum catalyst may cause gelling of the component containing the crosslinker. Therefore tools (spatula, stirrers, etc.) used for handling the platinumcontaining component or the catalyzed compound must not come into contact with this component.

The two components should be thoroughly mixed at a $9: 1$ ratio by weight or volume. To eliminate any air introduced during dispensing or trapped under components or devices a vacuum encapsulation is recommended.

Curing:
Curing time of addition curing silicone rubber is highly dependent on temperature, size and heat sink properties of the component being potted.

The reactivity can be adjusted within wide limits by adding Catalyst EP or Inhibitor PT 88 to suit the processing requirements of the particular application. Catalyst EP increases the reactivity, i. e., pot life and curing time are reduced. Inhibitor PT 88 is a pot life extender and prolongs pot life and curing time.
Further information is given in our leaflet "Catalyst EP/Inhibitor PT88".

We recommend running preliminary tests to optimize conditions for the particular application.

Please check also our brochures and info sheets.

## Packaging and storage

## Storage

The 'Best use before end' date of each batch is shown on the product label. Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.

## Safety notes

According to the latest findings, the addition-curing silicone rubber ELASTOSIL ${ }^{\circledR}$ RT 601 A/B contains neither toxic or corrosive substances which would require special handling precautions.

Comprehensive instructions are given in the corresponding Material Safety Data Sheets. They are available on request from WACKER subsidiaries or may be printed via WACKER web site http://www.wacker.com.
